

Lacquer Coatings

Quality Assurance Painting offers **Lacquer Coating** services for doors, desks, bookshelves, wood floors, kitchen or bathroom cabinets, handrails, and even for outdoor use on fences. Lacquer coatings are a substance consisting of resinous materials, as cellulose esters or ethers that dissolve in ethyl alcohol or other solvents that evaporate rapidly on application. Lacquer coatings produce a hard, glossy surface that is resistant to dirt and grime, that is easy to wipe clean off of, such as kitchen or bathroom cabinets. Lacquer coatings can also be applied to outdoor surfaces such as fences and decks. Lacquer coatings can be sprayed with an airless or HVLP sprayer, and can be a clear coat or a paint application.

Lacquer Coatings

Processes of Lacquer Coating

1. Determined what area you would like to use a lacquer coating on.
2. First sand using 320 sandpaper to remove imperfections or areas you desire, apply the stain with a brush in a uniform stroke.
3. Quickly wipe with a dry rag in a uniform way.
4. Thin down the lacquer with solvent recommend (*lacquer thinner*).
5. Apply lacquer with HVLP or Airless Sprayer with pressure very low in a uniform way.
6. Repeat as many times as required for the desire look.
