

# Power Washing

Quality Assurance Painting offers **Power Washing** services for residential and commercial properties. Power Washing also known as *Pressure Washing*, is a high pressure mechanical sprayer that can be used to remove loose paint, mold, grime, dust, mud, and dirt from surfaces such as the exterior of a house, decks, concrete surfaces that include driveways, garage floors, and interior walls or floors of commercial buildings.

## Power Washing Surfaces for Residential & Commercial

- Exterior Stucco
- Concrete
- Wood Decks
- Vinyl Siding
- Driveways
- Garage Floors
- Sidewalks

## **For Commercial Buildings**

- Interior Walls
- Parking Lots
- Concrete Floors

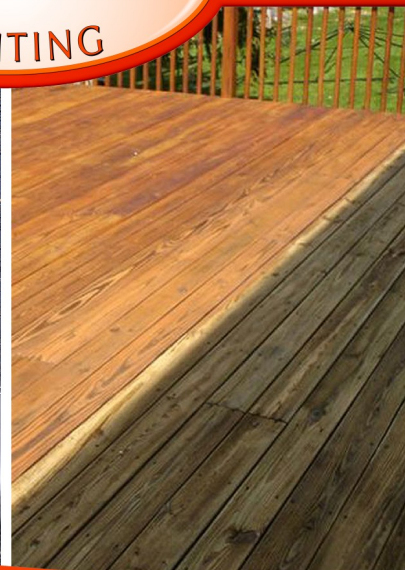

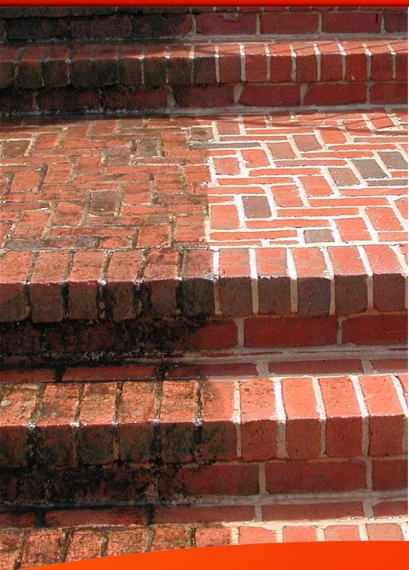

*Most exterior surfaces can be power washed and some interior surfaces can as well.*

## Commercial Property Power Washing

- Apartment Buildings
- Commercial Buildings
- Industrial Buildings
- Office Buildings
- Retail Stores
- Tilt Up Buildings

# Power Washing

## Processes of Power Washing

1. Determined what area you would like to power wash (*exterior surfaces only or for commercial buildings interior concrete walls and garage concrete*).
2. For Residential properties you want to first protect the interior window sill by applying towels or plastic to prevent water from protruding into the property.
3. Gently wash all surfaces not directly washing the windows because of the high pressure; Removes all dirt and unwanted items to clean or prepare for exterior paint job.
4. For Commercial Buildings start at the top and work your way down the wall(s).
